PARTICIPANT HEALTH & SAFETY

This email is being sent to Member Club/League Presidents, Registrars and Administrators [09.02.20]

SafeSport Refresh Course Update

To date we are still working with Player's Health to resolve the integration with the SafeSport refresher course; however, in the meantime we have a short-term solution with the approval of U.S. Soccer so that we can get our coaches/adults approved for the start of our Fall 2020 season now that we are able to return to competition.

Returning Coaches/Adults

Returning coaches/adults who completed the core SafeSport training course during the 2019-2020 seasonal year through Ohio North will be conditionally approved for carding and roster approval. This process may take up to 24 hours to complete so that any affected coaches/adults will be updated in Player's Health by the end of the day on Thursday, September 3, 2020, if not sooner.

It is important that you wait until tomorrow before attempting to do your SafeSport training. If this process is completed sooner, we will notify you.

The SafeSport refresher course should be integrated in approximately 6-8 weeks. Once the integration is completed, affected coaches/adults will be sent an email to complete the required annual SafeSport refresher course to remain approved for the rest of the 2020-2021 seasonal year.

Completed SafeSport Refresher Course

If you have already completed the SafeSport refresher course (*as of July 1, 2020 or later*) from U.S. Soccer, you may complete your compliance requirements now through the link you have previously received or will receive from Player's Health with the following options:

1. Enter your completion code found at the bottom of your refresher SafeSport training certificate when prompted, OR
2. Upload a copy of your refresher SafeSport training certificate completed as of July 1, 2020 or later when prompted.

Thank you for your continued commitment to our participant safety compliance requirements to ensure every member program involved with Ohio North is operating as safely as possible.
