Weather Related Rescheduling

1. Reschedule Process Due to Air Quality

- Games may be cancelled up to 3 hours prior to kick off time based on the air quality reporting.
  - Games will not be cancelled if the air quality reporting is not reflecting **RED**
- If the air quality index is reflecting **RED** take a screen shot of the air quality report from **Air Now** and submit that via email to UYSA Scheduler with the game number. **scheduler@utahyouthsoccer.net**
  - If the game location is listed as Not Available on the **Air Now** website, please include a screen shot of the error message and use the **Purple Air** website as your reference.

    Ex: The air quality screen shot must include the location of the game and show the time stamp from your computer or phone.

    Computer Example

    Phone Example

- The home team is responsible for contacting the opposing team, the field assignor and the referee assignor to notify them that the game has been cancelled due to the air quality.
  - *If the referee assignor is not notified of this game cancellation, the home team will be charged a referee payment fee.*
- The home team is responsible for rescheduling the game (following the weather related reschedule process)
- Game reschedules due to air quality must be rescheduled no more than 15 days from the original scheduled time.

2. Reschedule due to no referees, weather, unplayable fields

- If you are rescheduling your game due to no referees, unplayable weather or field closure you do not need to use one of your 2 allotted reschedules.
- After you have agreed on reschedule dates with the opposing team, field assignor and referee assignor, send in reschedule details to scheduler@utahyouthsoccer.net
- Include the game number, referee assignor approval, and field assignor approval in the email.
- After UYSA has received the reschedule request, it will be updated on your Affinity schedule.

UYSA reserves the right to move games back to original dates, times, and locations if teams did not follow the correct steps.
